Hamari Mitti Society

(Regd.No:571)
Support the Growth while you Grow

After its six years of research on Education
Presents...

Hamari Mitti Vidyalay

To Promote the Unbeatable Spirit in Child

Run by IITians and Guided by IITians

Vision:

To explore and put in action what one can do for the Mitti (the place) where one has born and on which one has been brought up and still growing on... for the self realization and sustainable growth of each individual, a family, a society, a country, this world as a whole and also environment.

Mission:

- ✓ To identify the current needs of the local region through ground work
- ✓ To find different ways of approach
- ✓ To execute the task by the involvement of all stake holders
- ✓ Feed back and implementation

Areas of work:

- ✓ Rural Development
- ✓ Environment
- ✓ Social Issues-Women Empowerment

Focusing Sectors:

- ✓ Education
- ✓ Agriculture
- ✓ Health

Legends used: In the booklet, in various Career paths you would come across certain legends, the significance of which is given below:

Scholarships

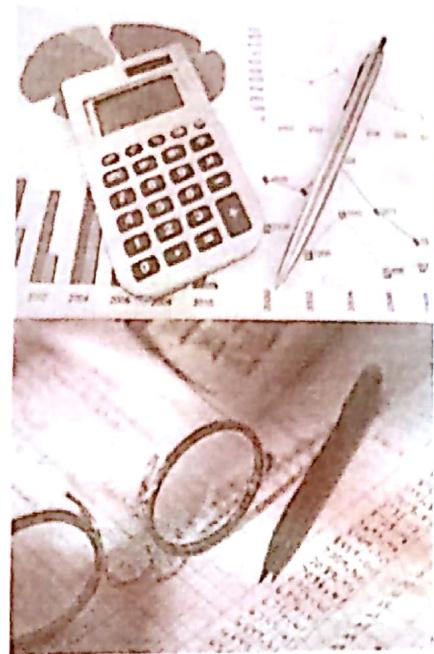

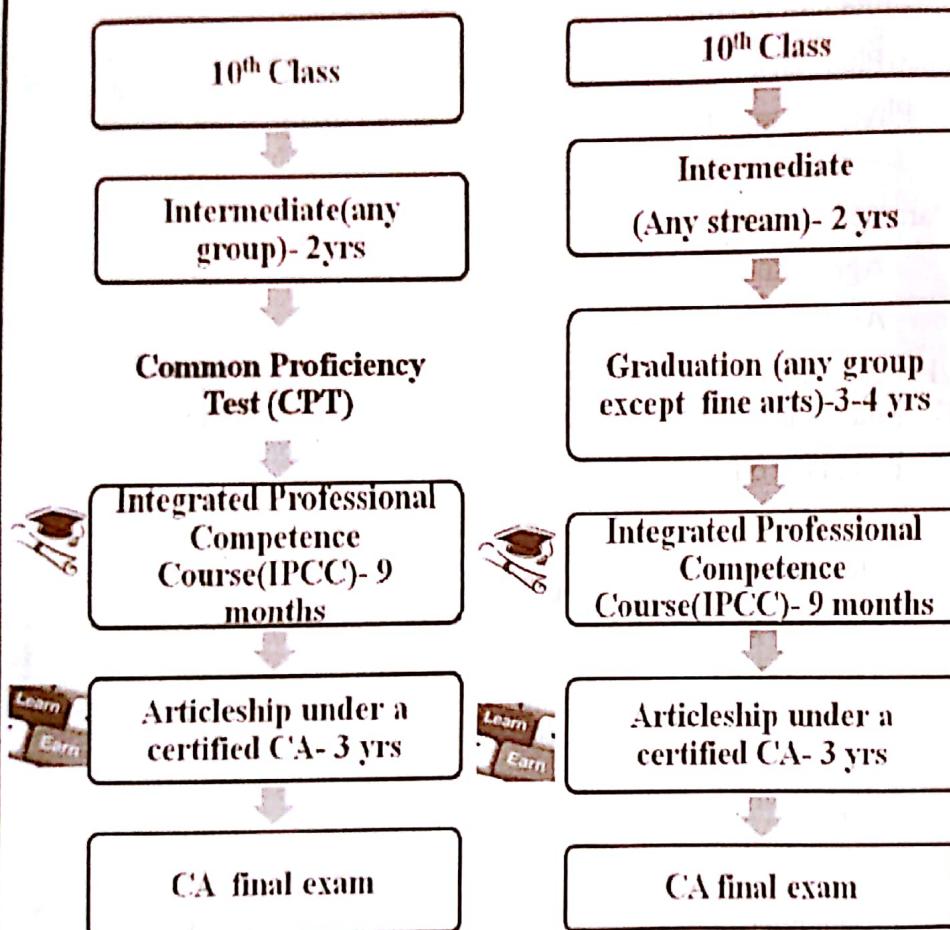

Fellowships-Earn while you learn

Chartered Accountant

As a Chartered Accountant, you will audit, analyze and verify your clients' accounts and give a fair financial picture. You could also work as a financial guide or consultant and push an organization's profitability. You will also advice clients on investments, general taxation and act as executors and trustees.

A day in life: Life as a chartered accountant can be very tedious. You might have to travel to the client's site and work. The work comes with deadlines and hence needs great speed with efficiency. You can also be your own boss, if you choose to have your own firm.

How do you get there?

Skills Required:

- Logical and analytical skills
- Critical outlook
- Good interpersonal skills
- Good organising abilities
- Meticulousness
- Excellent numerical abilities
- Working knowledge of Tally and excel sheets
- Internet Applications

Note: An aspirant of CA should register for CPT after SSC and appear for the test after Intermediate. After the successful completion of CPT, you should register for IPCC and complete the exam within 9 months of registration.

Notification time :

CPT – April and October

IPCC-January and June

Some of the institutions:

The Institute of Chartered Accountants (ICAI) is the body of education that is responsible for administering the CA education and training and also all activities of CA students. This body is also responsible for the certification and membership of a person as a Chartered accountant.

The Coaching required for CA is provided by various private coaching institutions, with the fees starting from Rs 40,000.

Fee details:

Course	Fee (in Rs)
CPT	Rs 6,000
IPCC	Rs 9,000
Articleship registration Fee	Rs 2,000
CA final course	Rs 10,000
Communication skills and IT training	Rs 18,000
Total	Rs 45,000

Places you work:

Registered firms

Management Consultancies

Banks

Other organizations

Salary : Rs 30,000– Rs 50,000 per month.

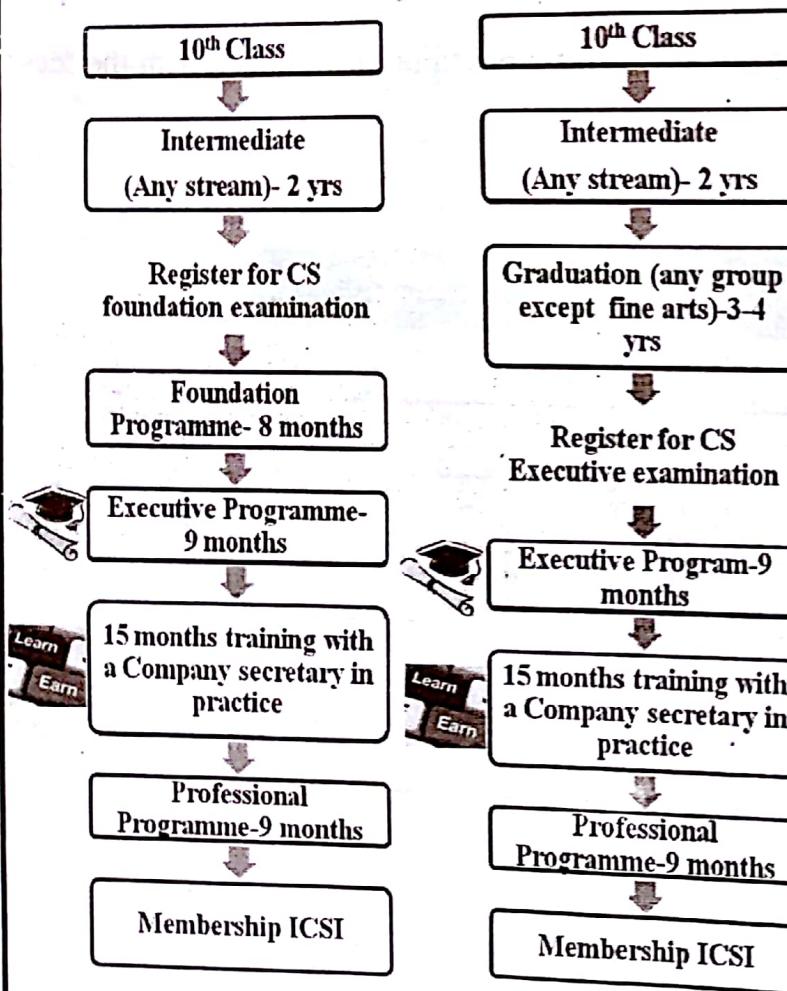

Benefits: Non-monetary benefits including holidays with pay, insurance, housing and transport.

Company Secretary

Company Secretaries are recognized by law, as a legal advisor to the company, plan expansion opportunities, overseas collaborations, acquisitions, mergers.

A day in life: Most Company secretaries work for individual corporations. They are not limited to a particular department as they have to take care of the legal aspects of the firm. The work also demands to travel to the head office of the firm to ensure that the operations do not contradict the law. It is highly a stressful job and demands integrity and honesty.

How do you get there?

Engineering

The branch of science and technology concerned with the design, building, and use of engines, machines, and structures.

Day in their life: These are professionals that create solutions to problems. Engineers work in the production of industrial equipment and consumer goods, design and produce technology, develop new methods and assist with various aspects of engineering

How do you get there?

Skills required:

Notification time: Feb/March

Fee Details:

Govt Universities: Rs 10,000 per year

Affiliated colleges: Rs 35,000– Rs 1,03,000 per year.

Salary: Rs 15,000-Rs 50,000 per month

Benefits: Can be in pace with technological enhancements.

Investigative and critical thinking
Strong mathematical and computing abilities
Deep understanding and application of Math and science
Team work
Good communication skills

Places you work

Software companies
Industries
Private and govt.sectors

Arise, Awake. Stop not till the goal is reached.

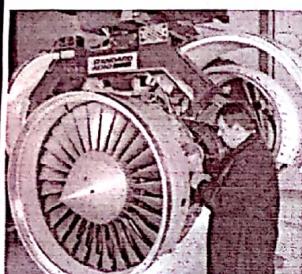

General Engineering Streams

Civil Engineering: They handle all the construction work. They are involved in the planning, research, survey and construction of all kinds of buildings, airports, dams, roads and transportation system, irrigation, power plants.

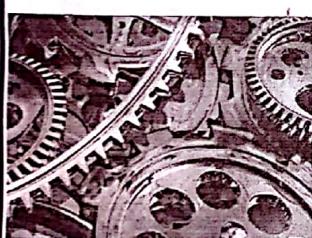

Electronics Engineering: Developing and designing electronics, construction and manufacturing of equipment, testing of new electronic equipment, maintenance of products, are the major works of an electronic engineer like phones, computers etc.

Chemical Engineering: A chemical engineer invents, develops, designs, operates and manages processes (conversion of raw materials into finished products) in industries.

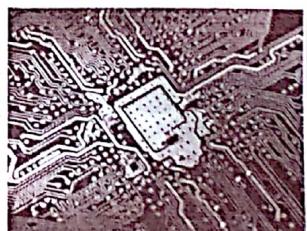

Aerospace Engineering: Aerospace engineers design, construct and test aircrafts, missiles, space crafts etc. They are also involved in researching new materials, engines, structures etc.

Computer Engineering: They are involved with the hardware and software aspects of a computer systems, design and development. They apply theories and principles of science, math, electrical technologies, digital technologies

Mechanical Engineering: A mechanical engineer designs, develops, and manufactures every kind of vehicle, power system, machine and tool. They are involved with anything that moves. You get to work on generators, combustion engines, turbines etc.

Electrical Engineering: An electrical engineer designs, develops, tests, and supervises the manufacture of electrical equipment. Some of this equipment includes power generators, power transmission devices, broadcast and communications systems, electric motors, lighting buildings, automobiles, aircraft, computers and other office equipment and home appliances.

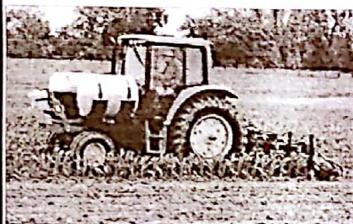

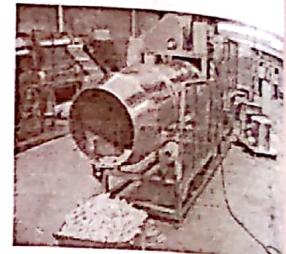

We are much stronger than we think.

Off beat Engineering Streams

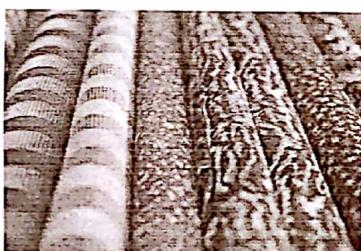

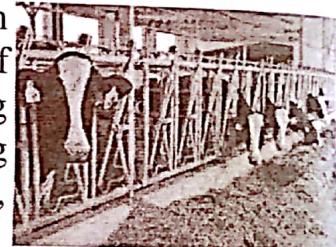

Food Technology:

As a **Food Technologist** you will use your skills to preserve food. It also deals with manufacturing confectionery, snacks and also the packaging of all these products for marketing and shipping . The food processing industry is engaged in converting food products like wheat, rice, sugar, oil, pulses, etc. into an edible form. As a **Food Technologist** you will be equipped with the knowledge of not only processing foodstuffs, but storage, research and quality control also.

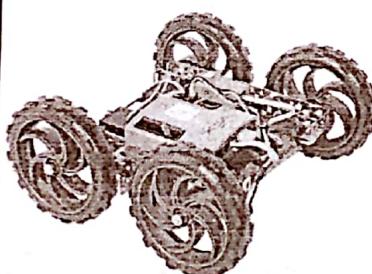

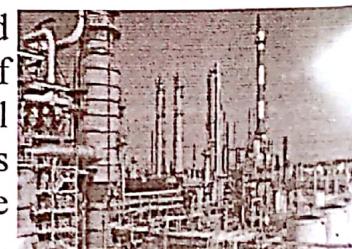

B.Sc Commercial Agriculture and Business Management: A comprehensive course that aims at crop-pasture production and management, soil science, livestock management and maintaining a delicate balance between environmental protection and profitable business.

Dairy Technology: The fundamentals of dairy technology are based on the science of Biochemistry, Bacteriology and Nutrition. This stream of engineering deals with the study of machinery used to process food using technology includes breeding and care of high yielding cattle, procuring and processing milk into a variety of dairy products like cream, butter, cheese, ghee, biscuits, ice-cream, puddings, custards, etc.

Textile Technology: Textile Engineering is the study of textile production, processing and its compatibility for the use of common man. Textile technology/Engineering deals with the application of scientific and engineering principles to the design and control of all aspects of fiber, textile and apparel processes, its products and machinery.

Petro chem. Technology: Petrochemical engineering is a specialized branch of Chemical Engineering which deals with the operations of refining and petrochemical technology, discover natural sources of oil and examine the same developing the latest machines and equipments which can be used in the extraction and processing of oil is part of the job of a petrochem engineer .

Mechatronics: A mechatronics engineer unites the principles of mechanics, electronics, and computing to generate a simpler, more economical and reliable system. Mechatronics is centered on mechanics, electronics, computing, control engineering, molecular engineering (from nano chemistry and biology) and optical engineering which, combined, make possible the generation of simpler, more economical, reliable and versatile systems .

Always do your best, what you plant now, you will harvest later.

List of Engineering Colleges

There are many engineering colleges across the state and the Country. However, we are listing an engineering college from each district.

National Universities:

Indian Institute of Technology

Birla Institute of Technology and Science

National Institute of Technology

State level institutions:

Sl. No.	District Name	Place	College Name
1	Adilabad	Basara	International Institute of Information Technology (IIIT).
2	Hyderabad	Tarnaka	Osmania University.
3	Karimnagar	Manthani, Jagityal	Jawaharlal Nehru Technological University
4	Khammam	Kothagudem	University College of Engineering.
5	Mahaboob Na-gar	Dharmapur	Jayaprakash Narayana Engineering College
6	Medak	Sultanpur	Jawaharlal Nehru Technological University
7	Nalgonda	Bommalaramaram	Adusumalli Vijaya College of Engineering & Res. Centre.
8	Nizamabad	Nizamabad	Vijay Rural Engineering College
9	Ranga Reddy	Kukatpally, Gachi-bowli	Jawaharlal Nehru Technological University, International Institute of Information Technology.
10	Warangal	Warangal	Kakatiya University, National Institute of Technology.
11	Anantapur	Anantapur	Jawaharlal Nehru Technological University
12	Chittoor	Chittoor, Pileru	Sri Venkateswara Engineering College, Jawaharlal Nehru Technological University
13	Kadapa	Idupulapaya	International Institute of Information Technology (IIIT)
14	East Godavari	Kakinada	Jawaharlal Nehru Technological University
15	Guntur	Guntur	Acharya Nagarjuna University.
16	Krishna	Nuzvid, Vijayawada	International Institute of Information Technoogy, Siddhartha Engineering College.
17	Kurnool	Kurnool	G Pulla Reddy Engineering College.
18	Nellore	Nellore	Narayana Engineering College.
19	Prakasham	Chirala	Chirala Engineering College.
20	Srikakulam	Rajam	GMR Institute of Technology.
21	Vijayanagaram	Gotlam	Jawaharlal Nehru Technological University College of Engineering.
22	Vishakapatnam	Vizag	Andhra University.
23	West Godavari	Bheemavaram	Sai Rama Krishna Raju Engineering and Technology.

You are never too old to set a new goal.

IIIT: International Institute of Information Technology (IIIT) is a research based institution that gives students Integrated education focused on research. Once a student is into IIIT, he gets to complete his Intermediate, Bachelors and Masters degree in the highly sophisticated ambience of IIIT.

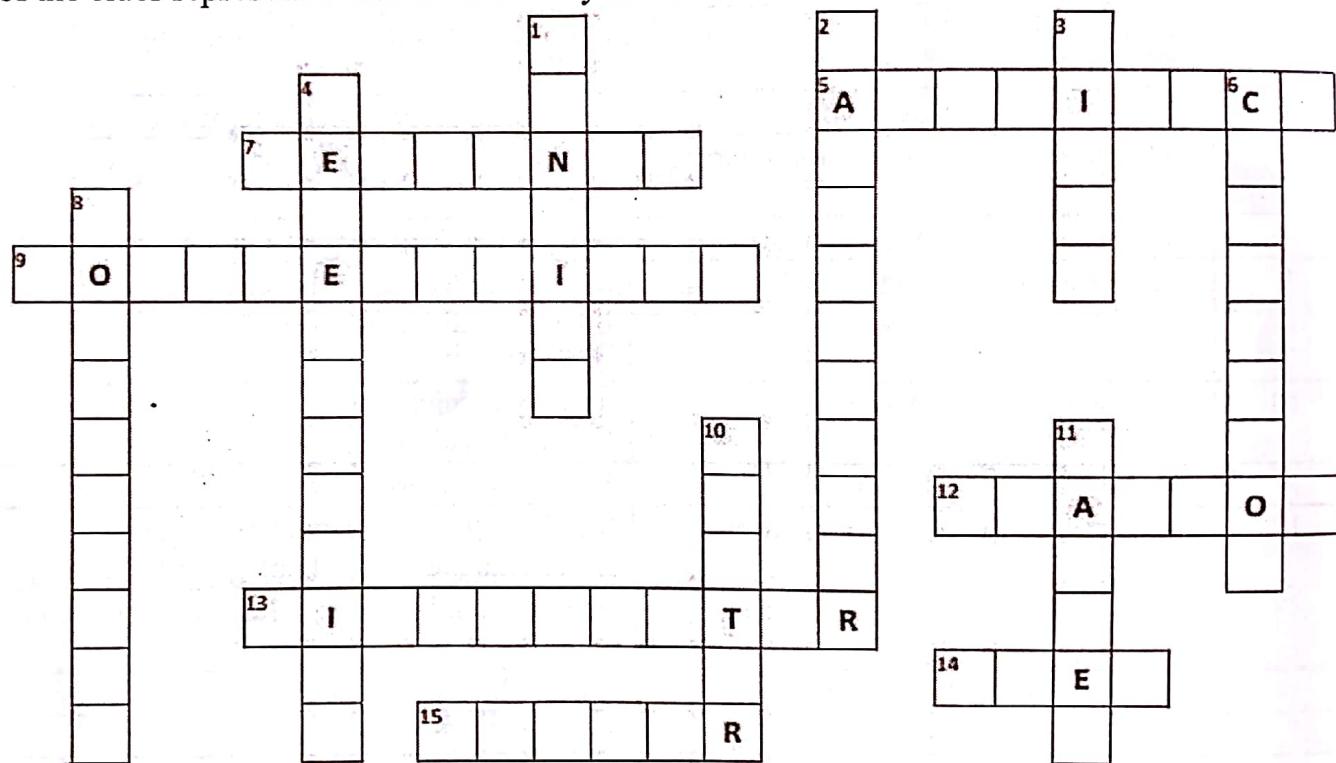

The admission into IIIT is on the merit of SSC. The intermediate education in IIIT is M.Bi.P.C. After Intermediate, you are open for opportunities from both Math and Science. To pursue a higher education in Maths, you can continue in IIIT or drop out after Intermediate.

Career Crossword

Look at the clues below and fill the word grid.

Each of the clues represent a career. So tease your brain now and fill the Career Grid!

ACROSS

- 5 Designs buildings.
- 7 Fixes cars.
- 9 Enforces the laws and keeps you safe
- 12 Helps you buy a house.
- 13 Puts out fires.
- 14 Cooks meals at a restaurant.
- 15 Keeps your money safe.

DOWN

- 1 Cleans your teeth and keeps them healthy.
- 2 Cuts your hair.
- 3 Can fly a plane.
- 4 Doctor that helps animals.
- 6 You can talk to them about your problems.
- 8 Writes newspaper articles.
- 10 Helps you feel better when you are sick.
- 11 Grows fruits and vegetables.

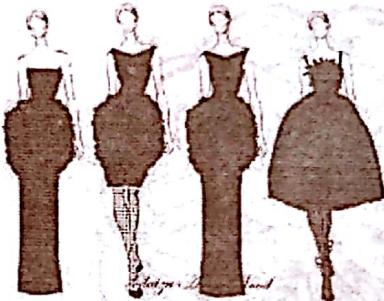

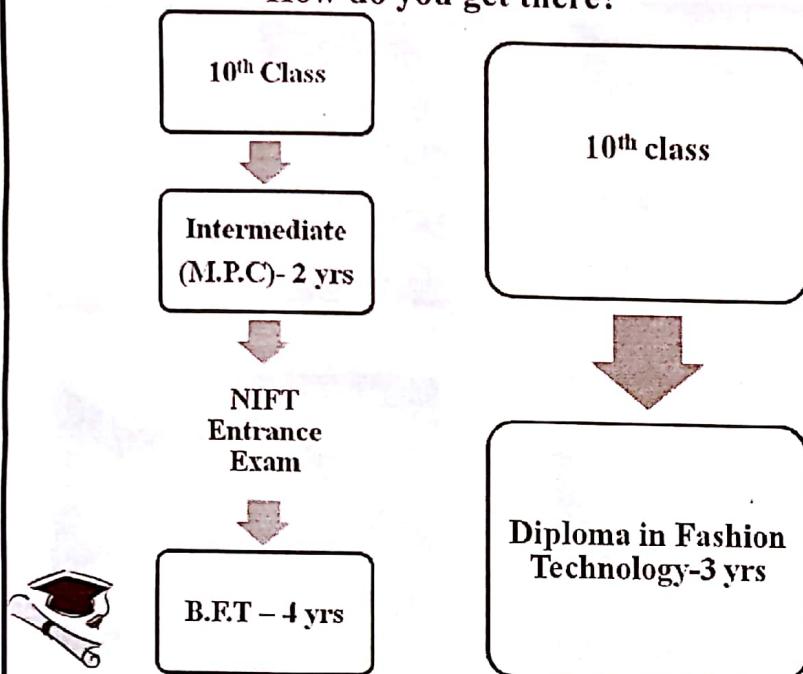

The will to win, desire to succeed, the urge to reach to your potential, these are the keys to unlock the door of excellence.

Fashion Technology

This profession is concerned with creating innovative and inspiring garments that enhance the personality and characters of individuals. One needs to have a passion for line, shape, texture, colour, drape and fabric for this field.

A day in life: Creative work where one should be able to guess future fashion trends, participate in fashion shows, visit buyers. You might also travel around the world, meet lots of designers. You will have to experiment with the fashion and if it clicks you would be a trend setter.

How do you get there?

Skills required:

- Updated with current trends
- Creative
- Knowledge of textiles
- Eye for color and style
- Skills to convince your clients

Notification time: November-February

Fee particulars : Rs 81,000 per semester

Some of the institutions:

- National Institute of Fashion Technology (NIFT), Hyderabad
- International Institute of Fashion Technology (INIFT), Delhi
- Vogue Institute of Fashion Technology, Hyderabad
- Polytechnic Colleges.

Salary: Rs12,500 -35,000 per month

Benefits: Including health benefits, sick leave and paid vacations. Moreover, costume designers enjoy the ability to travel the world as a part of their job.

Places you work:

- Fashion designing houses
- Garment manufacturers
- Textile manufacturers
- Fashion show organisers
- Fashion magazines and consultants
- Fashion consultants
- Jewellery Designing.

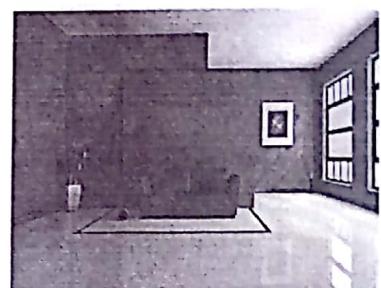

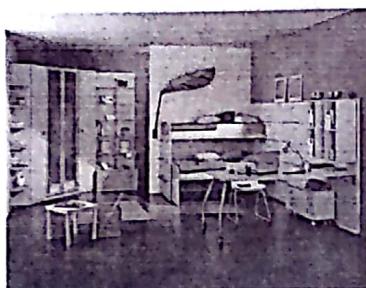

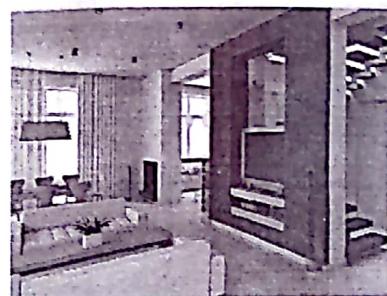

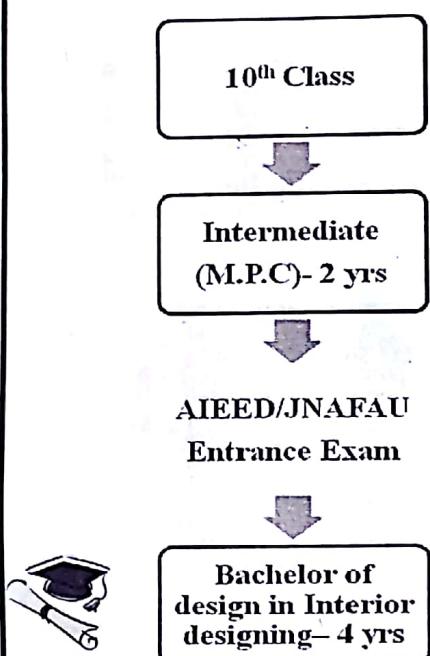

If opportunity doesn't knock, build a door.

Interior Designing

An interior designer is someone who works turning an interior space into an "effective setting for the range of human activities".

A day in life: A large part of their time is spent in meetings with contractors, clients and suppliers, and there may be large amounts of travelling involved in this career. Interior design is about 90% networking, marketing, selling, knowing the right people 7% paperwork and 3% design.

How do you get there?

Notification time: November– April

Course Fee: Rs 35,000 per semester

Some of the institutions:

India Institute of Technology, Mumbai

National Institute of Design, Ahmedabad

College of Architecture, Nashik

JNAFAU, HYD.

SPA, Vijayawada.

Arch Academy of Design, Jaipur

Salary: Rs 30,000 -40,000 per month.

Skills required:

Creativity

Ability to visualize concepts

Good communication skills

Ability to plan

Concentration and focus

Places you work:

Visual Merchandising

Freelancer Designer

Interior design firm

Event Management Company

Production design.

Benefits: Interior designing lets you be free and allows the 'creative genius' in you run wild. You can be your own boss.

You have to believe in yourself.

Doctor

The Doctor is a health care provider who practices medicine, which is concerned with promoting, maintaining and restoring human health through the study diagnosis and treatment of disease, injury and other physical and mental impairments.

A day in life: A highly respectable job where you give life to a patient. It requires that you be emotionally strong and be ready for hectic schedules. As a doctor you might have to work in the night shifts too. At times of emergencies you are expected to be available.

Off beat career options

Animator:

An animator produces multiple images called frames, which when sequenced together rapidly create an illusion of movement known as animation. The images can be made up of digital or hand-drawn pictures, models or puppets.

Entrepreneur:

Entrepreneur is someone who identifies and starts a business venture, sources and organizes the required resources and takes both the risks and rewards associated with the venture.

Nuclear Physicist:

A Nuclear physicist is someone who studies the smallest particles known to man, atoms and their component sub atomic particles. They even work on orbiting space stations to study effects of lack of gravity on atoms.

Forensic scientists:

As Forensic scientists, you will be required to apply scientific knowledge and skills to investigate crimes. The role of the forensic scientist is twofold: to analyze physical evidence found on a victim at the scene of crime and compare it to evidence found on a suspect and to provide expert testimony in a court of law.

Astrophysics:

Astrophysics is the study of heavenly objects like the stars, planets, comets and galaxies and other objects that exist beyond the earth's atmosphere. Astrophysics is a combination of various disciplines like, physics, mechanical engineering, material science, chemistry, biology, medicine, psychology, computer science and other fields of scientific knowledge.

Medical transcriptionists :They type up written reports of the audio files doctors record after they interact with patients. These written reports are then included in the patient's medical record.

Overseas Education

Overseas education is a right option for those who aspire to have education with global exposure. This will not only provide a global outlook to the education, but also facilitate the cultural exchange.

Programs you can pursue:

You could pursue professional education like engineering, management, pharmacy etc. or vocational like retail, humanities, personal care and fitness etc.

What countries you can fly to: USA, UK, Canada, Singapore, New Zealand, Spain, Ireland, France, Germany

Procedure for Abroad Education:

Step 1: Decide your study plans, the kind of program you want to enrol in, streams of your choice etc.

Step 2: Appear for the appropriate tests much before the date of plan of travel to avoid last minute disappointments.

Program	Description	Exams to take	Details
